The purpose of this conference is to motivate pre-college minority students to pursue higher education and hopefully choose technical

The NSBE Region VI Camping conferences have been a part of NSBE as long as national conferences. NSBE's first pre-college program, the camping conference, originated in Region VI. The 1st camping conference was in 1971 and the first official NSBE camping conference was held in 1975. The purpose of this conference is to motivate pre-college minority students to pursue higher education and hopefully choose technical fields as their area of study when they get there. It also provides opportunity to introduce pre-college students to careers in engineering and technology through a series of workshops and team-based engineering projects. The hope is that without distractions, the students will be more focused and activities planned by NSBE will be more effective.
